

## Liste des revues AERES pour le domaine

### PSYCHOLOGIE-ETHOLOGIE-ERGONOMIE

(Mise à jour le 12 /07/2011)

*Pour de nombreuses disciplines de Sciences humaines et sociales la production de livres reste la forme majeure de l'œuvre scientifique. Parallèlement, la multiplication des revues constitue aujourd'hui un outil essentiel d'animation et de diffusion permanentes dans le milieu de la recherche.*

*Des commissions disciplinaires regroupant des représentants des sections du CoNRS et du CNU, des membres de l'IUF, des personnalités qualifiées étrangères et les délégués scientifiques de l'AERES ont été constituées en 2008 ; elles ont abouti à l'élaboration des premières listes, publiées sur le site de l'AERES et actualisées pour ce domaine en octobre 2009 et juillet 2011.*

*Ces listes ne constituent pas un cadre contraignant et l'appréciation de la qualité des travaux par les experts reste le critère primordial d'évaluation.*

#### Membres de la commission d'actualisation

Ont ainsi participé à la commission d'actualisation de la liste Psychologie-Ethologie-Ergonomie :

- Nathalie Bonnardel, IUF
- Elisabeth Demont, CNU 16<sup>e</sup> section
- Michel Fayol, Université Clermont Ferrand
- Martin Giurfa, CoNRS section 27
- Sonia Kandel, IUF
- Ludovic le Bigot, Université de Poitiers
- Jean-Jacques Rassial, Université de Provence
- Arlette Stréri, IUF
- Simon Thorpe, Conseil de l'Aeres
- Jacques Vauclair, IUF
- Annie Vinter, Délégué scientifique Psychologie à l'AERES

#### Modalités d'élaboration de la liste

La liste est constituée de l'ensemble des revues référencées dans PsycINFO, d'une partie de celles d'Ergonomics Abstracts, de revues d'éthologie (élection constituée par des pairs), et d'une partie des revues de PubMed (élection effectuée par le CNU 16<sup>e</sup> section). La commission a décidé de ne pas caractériser ces revues en fonction d'un critère de qualité scientifique. C'est donc une liste unique, une liste « périmètre », qui est adoptée. Toute publication dans une de ces revues est retenue pour caractériser la production scientifique d'un laboratoire pour ce qui concerne les publications scientifiques (si une revue ne figure pas dans cette liste mais est référencée dans le Web of Science, elle est également retenue pour caractériser la production scientifique d'un laboratoire).

Cette liste comprend trois colonnes : le titre de la revue, son ISSN et l'identité de la base de données dans laquelle elle se trouve référencée et éventuellement classée (PsyInf = PsycINFO, ErgAbs = Ergonomics Abstracts, Scimago = SCImago ; ERIH = ERIH ; JCR = Journal Citation Reports de Thomson Reuters, PubMed = PubMed sélection du CNU 16<sup>e</sup> section, Eth = revues d'éthologie). Lorsque l'on voit apparaître en colonne 3, « PsyInf

Scimago JCR » par exemple, cela signifie que la revue en question est référencée dans PsycINFO, SCImago et dans le JCR.

Afin de pouvoir situer la visibilité de ces revues les unes par rapport aux autres, les enseignants-chercheurs et chercheurs peuvent consulter l'une des trois bases de données suivantes :

\*SCImago (<http://www.scimagojr.com>) interroge la base Scopus et est en accès libre ; \*L'European Science Fondation (ESF, voir <http://www.esf.org/>) propose une liste de revues dans le domaine des humanités par disciplines, ERIH (<https://www2.esf.org/asp/ERIH/Foreword/search.asp>). L'accès est libre.

\*Le JCR indexe de nombreux journaux par disciplines ([http://thomsonreuters.com/products\\_services/science/science\\_products/scientific\\_research/research\\_evaluation\\_tools/journal\\_citation\\_reports/](http://thomsonreuters.com/products_services/science/science_products/scientific_research/research_evaluation_tools/journal_citation_reports/)). Son accès se fait en fonction des abonnements souscrits par les universités et/ou par les organismes de recherche dont les laboratoires relèvent.

Chacune de ces bases propose des classifications de visibilité des revues à partir d'indicateurs différents (SCImago Journal Rank pour SCImago <http://www.scimagojr.com/aboutus.php> ; internationalisation pour l'ERIH <http://www.esf.org> ; facteur d'impact pour le JCR) pour une discipline ou sous-discipline donnée. En outre, SCImago propose une classification des revues en quartiles (une même revue peut relever de deux quartiles différents selon la (sous-)discipline considérée). L'ERIH propose une classification des revues en fonction du rayonnement international ou non de la revue (INT1, INT2, NAT). Le JCR propose une classification des revues en quartiles sur la même base que SCImago. Le croisement de toutes ces informations permet d'avoir une connaissance élargie de la visibilité des revues pour un champ disciplinaire donné.

Les laboratoires peuvent utiliser les classements de visibilité des revues dans ces bases de données pour effectuer une auto-évaluation de leur production scientifique. Le choix entre ces trois bases de données peut se justifier de différentes façons, et une unité de recherche (ou une équipe) peut arguer pourquoi elle considère que telle base est plus appropriée que telle autre pour mettre en valeur sa production scientifique. En l'absence d'auto-évaluation de la part du laboratoire ou des équipes, le comité d'experts sera souverain pour choisir la base de données de référence pour son analyse de la visibilité des supports de publication du laboratoire.

Il est précisé que pour être « produisant », un enseignant-chercheur ou un chercheur doit avoir publié respectivement 2 ou 4 productions scientifiques liées à son activité de recherche en 4 ans, sous forme d'articles de recherche dans une revue reconnue (voir ci-dessus) ou de chapitres d'ouvrage ou d'ouvrages de recherche. Les productions sous presse ne sont pas considérées. Le comité d'experts reste toutefois juge de l'appréciation qualitative et quantitative de la production scientifique d'une unité de recherche.

*Pour les travaux effectués dans d'autres champs disciplinaires, il convient de se reporter aux listes établies par les commissions d'actualisation correspondantes. Le travail régulier des commissions aboutira à des révisions annuelles. Pour tout renseignement, s'adresser au Délégué scientifique coordonnateur adjoint SHS à l'AERES chargé de l'actualisation des listes de revues, [Jean-Paul Barrière](#), qui se mettra en rapport avec le Délégué scientifique du domaine concerné.*
